MOVING TO A NEW CITY? MAKE THESE APPS YOUR COMPANION!

Moving to a New City due to job transfer/ promotion or due to joining a college? Whatever the reason is – getting settled in a new city can always be a little nerve-racking. Initially, it's difficult to figure out local transport, accommodation, restaurants, help for local services and more. But as long as you have that smartphone with you, help is at hand. From locating a doctor in the vicinity to getting your medicines delivered to your door, from ordering home cooked meals to getting familiar with the public transport, and even finding background-checked service professionals for various handyman jobs like plumbing, electrical servicing, cleaning, etc., there's a slew of user-friendly apps that will help you settle down in a new city without any hassles. Have a look!

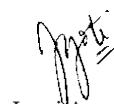

a note from the **EDITOR**

Getting settled in a new city can always be a little nerve-racking. The good news is that there are apps that can make your life easier, and help you settle down in a new city smoothly. This month, our cover story is about the apps that you must try if you are moving to a new city. From locating a physician in the vicinity to getting your medicines delivered to your door, from ordering home cooked meals to getting familiar with the public transport, and even finding background-checked service professionals for various handyman jobs like plumbing, electrical servicing, carpentry, house cleaning, etc., – help is at hand as long as you have a smartphone with you.

Then check out our *Finance* section from page 18, if you'd like to get your personal expenses under control. The apps like *Spending Tracker*, *Walnut*, *Monefy*, and *AndroMoney* provide you an easy-to-use interface where you can keep a track of your expenses and income. The simple fact is, by tracking your spending you'll be able to stick to a budget, and that'll result in savings.

Then there is the *Games* section that features action-packed racing games that you must try, namely *Traffic Rider*, *Lane Racer*, and *Viber Rude Rider*. Also, don't forget to check out our *New Releases* section, if you'd like to know the new apps that are now available on the app stores and worth checking out.

GET THAT FOOD DELIVERED

For the first few days after moving, you might be too busy setting up your new flat – cooking food at the end of a hard day of work will be a tough job. And since you're new to the city, you probably won't know which restaurants deliver to your area. The easy solution is to use apps such as *Zomato Order*, *TinyOwl* and *Foodpanda* to order food from restaurants in the vicinity. Just allow the app to detect your location or choose manually, browse through the restaurants' menu and place your order. Simple! Then there are new set of apps such as *Faasos*, *Yumist* and *InnerChef* that deliver home cooked, delicious and wholesome meals to your doorstep.

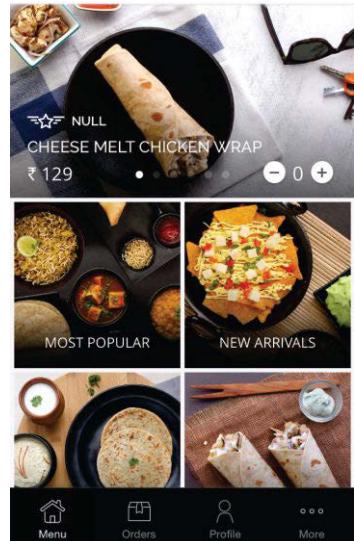

COVER STORY

FAASOS

iOS, ANDROID | FREE

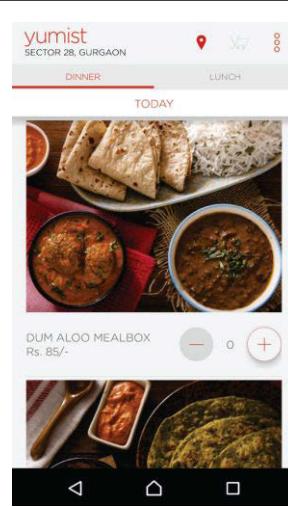

YOUR LOCALITY ▾
Gurgaon, Gurgaon

InnerChef is another app that is doing the great job of delivering fresh, delicious and healthy meals to your doorstep. Just like *Yumist* app, *InnerChef* also has its own kitchen where the food is prepared by the expert chefs. Currently, *InnerChef* has a presence in Gurgaon, Noida, South Delhi, West Delhi, Bengaluru and Chennai.

Faasos app answers the most asked question – "#AajKhaneMeinKyaHai"? ("What's for food today?"). Across 15 cities in India and 200+ locations, *Faasos* lets you order breakfast, Indian meal boxes, wraps and rolls, rice and biryani combos, snacks, Chinese, South Indian, and lip-smacking desserts – just grab your mobile, place your order and get piping hot food delivered. The app displays a menu that is appropriate for the time of the day and location.

Yumist

iOS, ANDROID | FREE

Hot, Healthy and Homely food right at your doorstep – that's the motto of *Yumist*. Rather than connecting you with local chefs and restaurants in your neighbourhood, *Yumist* prepares food in its own kitchen using the freshest ingredients to ensure every meal it serves is wholesome and memorable. Moreover, with a daily changing menu of home cooked meals, you would find a new surprise every day. It serves only in Gurgaon, South Delhi, and Bengaluru, as of now.

FIND A PLACE TO STAY

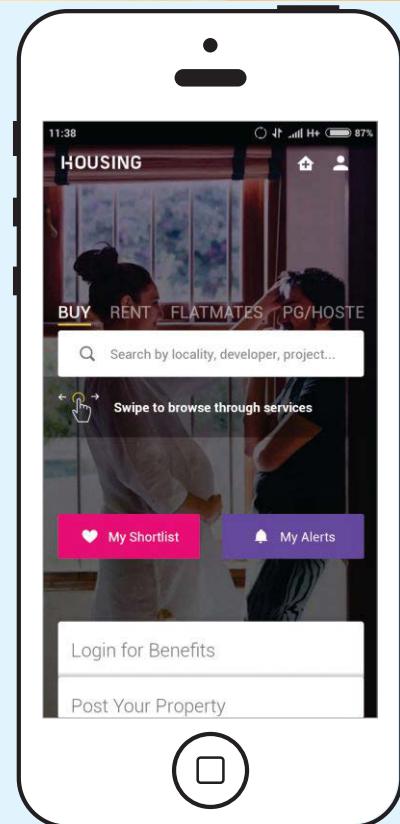

Looking for a place to stay is one of the most difficult and tiring process. Don't have enough free time to move from door to door to ask for a rental space? Well, mobile apps such as *Housing*, *99acres*, and *Magicbricks* are useful to locate available residential properties in a particular area. Then there are apps like *Flatchat* and *FlatMate*, which directly connect you with property owners, PG owners and other people looking for flats. You can chat with them via the app and even explain your requirements. Best of all, you avoid brokers.

Housing

iOS, ANDROID | FREE

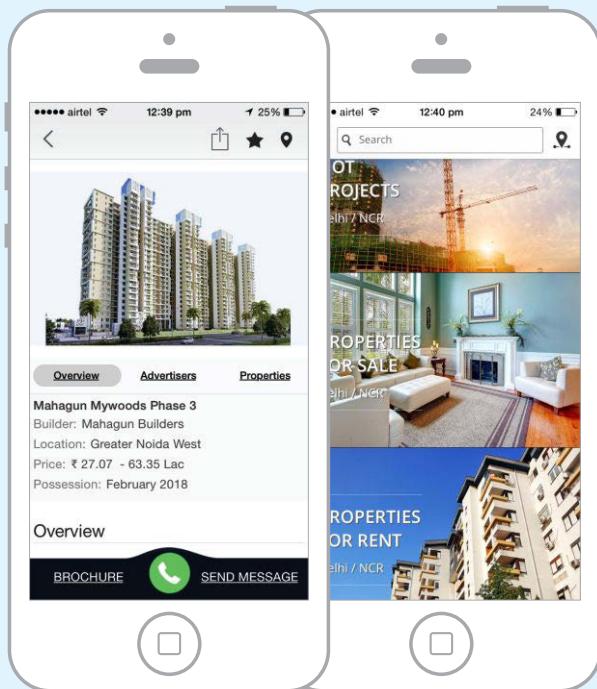

Housing is an app that, in a way, specialises in residential properties. Whether you are looking to buy or rent a flat, give this app a try. It lets you search for flats in a particular city, in a particular area, in a particular budget and with certain preferences like – 1BHK/2BHK/3BHK, Fully furnished/Semi furnished, etc. The best part is that it gives you detailed photographs of each and every property listed on its platform. So you can easily make out from the pictures whether the property is of your interest or not before visiting it. Add to that, you can also explore neighbourhood on a map. You can check out bus stops, schools, hospitals, markets, restaurants, ATMs, etc. near to the property. Then, you can also give a direct call to a landlord for enquiring further details.

99acres

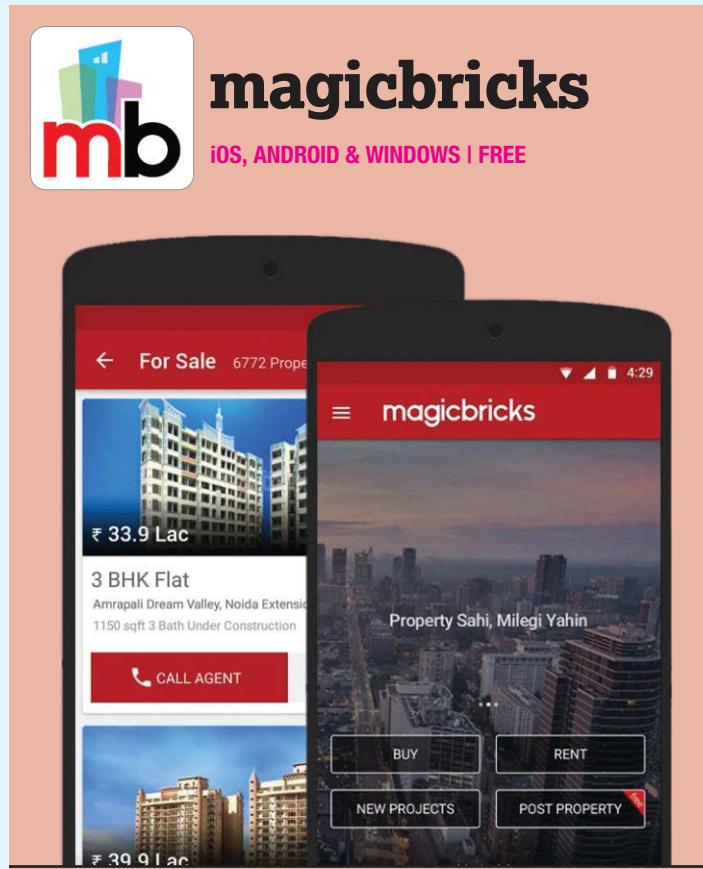

iOS, ANDROID | FREE

With *99acres* mobile application, property search has become far easier than it used to be. The app's home screen gives you direct access to hot projects, properties for rent, properties for sale, under construction projects, ready to move projects, and new launch projects in a city. Just tap on any of the tab to begin your property search. You can use filters such as price, locality, area (sq. ft.), builder, etc. to narrow down your search. The app gives you detailed information about every property, including overview, layouts & floor plans, map view and similar projects. You can also download the brochure or directly contact the builder by providing your credentials.

Then you also have the option to straightaway search for residential or commercial property. Just let the app know a few details like location, property type, price range, buy/rent, etc. to bring you the property search results matching your requirements. You can then directly contact the property owner for further details.

So, in essence, you should probably give this app a go if you are looking to buy a property or a flat on rent. This app works fairly well.

Simple, clean yet visually appealing, this Real Estate app is designed to fulfill your residential & commercial property requirement in a very simple and fast way. It neatly categorizes listed properties into 3 tabs: Buy, Rent and New Projects. Suppose you want to buy a residential property, just tap the Buy tab, and fill out a form, providing a few key details such as location, property type, no. of bedrooms (1BHK/2BHK/3BHK/4BHK), and budget. Based on your criteria, you'll get a list of properties in no time.

The app gives you a detailed overview of the property, which include property description, facilities nearby, owner details, in addition to a locality review. You can check out the locality on a map as well as locality reviews and ratings. Not only that, the app's 'Price Trends' feature allows you to evaluate property value, so you can decide whether buying a property at that point of time is sensible investment or not. In other words, you can stay up-to-date with the latest price trends in the property market with this feature. All this information really helps in shortlisting properties and taking a well-informed decision. Overall, this is a great app to begin your property search.

GET YOUR GROCERIES DELIVERED TO YOUR DOOR

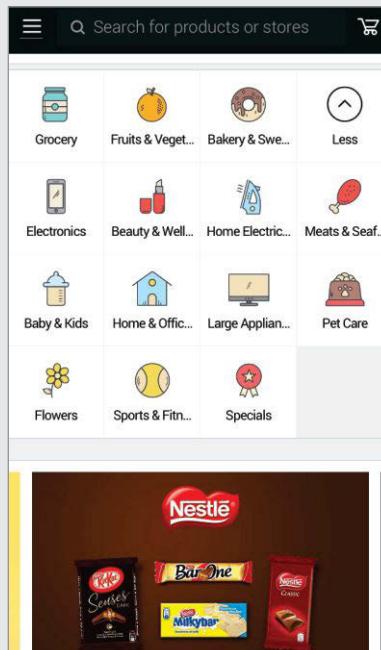

Finding vendors that sell quality groceries and other everyday essentials is not easy. You can ask around but you're also likely to get confused. Instead of trying out different shops, you can use apps such as *Grofers*, *BigBasket*, and *ZopNow*, to name a few. With just a few taps on your phone, you can order everything from fresh vegetables to dairy items and personal care products. Not only you get your groceries delivered right to your doorstep on the same day, you also have the option to return the products that you think are not acceptable at the time of delivery. Thus, you can pay only for those items that you've accepted. Each app supports multiple payment methods, including Cash/Card on Delivery.

iOS, ANDROID | FREE

With over 18,000 products and 1000 brands in *BigBasket*'s grocery list you will find everything you are looking for. Plus, you can search for any product on the app using keywords or by scanning its bar code. The app also has built-in chat feature, so you can also chat with a customer service executive, in case of any query. The delivery charge is Rs. 20/- for orders below Rs. 1000/- in value, and cities covered by *BigBasket* are Delhi, Noida, Gurgaon, Bengaluru, Kolkata, Chennai, Hyderabad, Mysore, Mumbai, Pune, Madurai, Coimbatore, Vijayawada, Ahmedabad, Nashik, Lucknow, Visakhapatnam and Vadodara.

Grofers

iOS, ANDROID | FREE

Based on your current location and the product you want to buy, the app provides you a list of *Grofer*'s partner stores that deliver to your area along with their customer ratings and minimum delivery time. Using this app, you can also shop for electronics, bakery items, flowers and bouquets. There is no minimum order value. However, you've to pay Rs. 49/- as delivery charges for orders below Rs. 250/- in value. Currently, the app is operational in 17 Indian cities including all metro cities.

IOS, ANDROID | FREE

This is the best app to buy international gourmet food products as well as Indian groceries, delivered Pan-India. It also offers a wide range of exotic fruits, health foods, premium and organic groceries, confectionery and gift hampers.

Free apps such as *Ridlr* and *Zophop* offer details on public transport, including the option to find the best way to travel from one location to another. Add to that, you can get real-time information about bus, local train, metro and monorail schedules, including delays.

Ridlr

ANDROID | FREE

Ridlr takes the hassle out of using public transit by giving you all the information you need, right at your fingertips. The moment you open the app, it detects your current location, and then shows you traffic around you on the map. Add to that, it gives you timetables of bus, metro, train and other public transport available in the city, along with the details of all the nearby stops. In other words, it tells you exactly when the next bus, train or metro rail will arrive so you can plan your journey with ease, even using multiple modes of transport. Timetables can also be downloaded for offline use.

You can also use this app to find out the quickest route from Point A to Point B. Best Part? It factors in road blocks, diversions, delays and sudden cancellations while suggesting any mode of transport to you. Cities covered by *Ridlr* are Mumbai, New Delhi, Bengaluru, Pune, Ahmedabad, Chandigarh, Chennai, Jaipur, Bhavnagar, Bhopal, Bhubaneswar, Hyderabad, Indore, Kolkata, Ludhiana, Bellary, Nagpur, Vadodara and Vijayawada.

GET YOUR MEDICINES DELIVERED TO YOUR DOOR

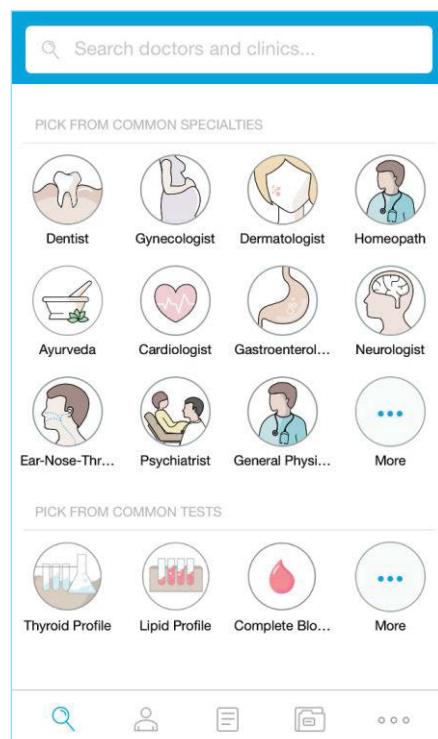

Finding a chemist in most cities is not an issue, you might not have the spare time to visit one during the moving process. No worries! There are apps that let you order medicines online, book lab tests and find a doctor in the vicinity. Let's have a quick look at these apps:

FIND AND BOOK AN APPOINTMENT WITH A DOCTOR

Practo enables you to find the best doctors in your vicinity and book instant appointments. You can find doctors based on their speciality as well as by their name or clinic name. Before booking an appointment, you can even go through the profile of a doctor, which include experience, qualifications, clinic timings, address, consultation fees, reviews by other patients as well as number of recommendations. All this information helps you in taking a well-informed decision. Not only *Practo* services are available in more than 100 Indian cities, it also has its presence in the Philippines, Indonesia, Malaysia and Singapore. What's more, *Practo* also lists diagnostics labs nearby and lets you book the lab tests over the call.

NEED A HANDYMAN OR ANY OTHER LOCAL HELP? THERE'S AN APP FOR THAT.

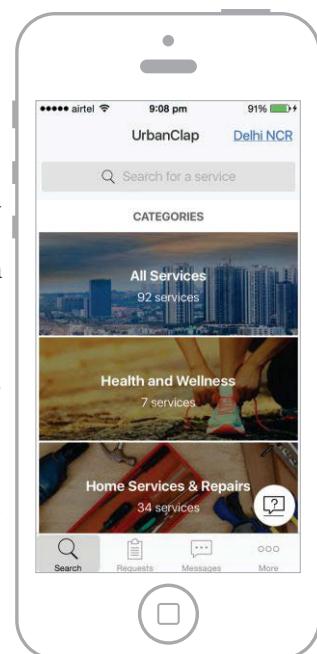

Finding reliable handyman services in a new city is quite a big challenge. That's where apps like *UrbanClap*, *Zimmber*, *HouseJoy*, *FindYahan* and *MrRight* prove useful. These apps let you book trusted professionals for all your home needs. From home cleaning to pest control, to handyman jobs like plumbing, electrical servicing and carpentry, and even getting help with laundry services and driver on demand, these apps got you covered. In fact, *UrbanClap* and *FindYahan* are two such apps that let you find service professionals as well, such as fitness trainers, wedding planners, party organizers, photographers, tutors, babysitters, etc. In all, these apps make hiring a service professional or a handyman as easy and straightforward as buying a product online.

UrbanClap

iOS, ANDROID | FREE

From an electrician to a professional physiotherapist or a trained fitness trainer, you can find help for your every need on *UrbanClap*. There are nearly 91 services (including both home and professional services) listed on the app. When you select a particular service to book, the app will provide you basic information such as minimum booking amount, cancellation charges, etc., and also ask you about your requirements via few simple multi-choice questions in case of a professional service such as yoga trainer, event planner, dance teacher, etc. Within a few hours, the app will send you detailed profiles of 3-5 background-checked service professionals matching your requirements. You can then chat and negotiate with them to hire their services. The entire process of booking a service is quick and painless. *UrbanClap* is currently active in Ahmedabad, Bengaluru, Chennai, Delhi/NCR, Hyderabad, Mumbai and Pune.

Zimmber

iOS, ANDROID | FREE

With *Zimmber*, you can book for reliable and trusted handyman services such as plumbing, home appliances servicing & repairing, carpentry, wall painting, car washing, and even for laundry services and driver on demand. To book a service, all you have to do is select a service from the list, view rate card, select date and time, and confirm your address. For most services, *Zimmber* has standard prices. Currently, cities covered by *Zimmber* are Delhi/NCR, Mumbai and Pune.

Traffic Rider

By Soner Kara

From the creators of terrific *Traffic Racer* mobile game, here comes a motorbike variant called *Traffic Rider*. This time, you are behind the wheels of a motorbike in a much more detailed gaming experience. *Traffic Rider* is an adrenaline rush.

About Gameplay: *Traffic Rider* focuses on navigating various two-wheeled vehicles (mopeds to motorcycles) through busy highways and city streets, dodging the traffic while attempting to complete the various missions that each level requires. You can control your bike's movement by tilting your mobile device left or right. The catch is that the other vehicles on the road have a mind of their own, accelerating or braking in odd places. But, you get bonuses, cash (in-game currency)

and extra time for maintaining a speed over 100 km/h and overtaking traffic cars closely. The faster you ride, the more scores and rewards you get.

You can use earned cash (in-game currency) to upgrade your motorbike; you are allowed to upgrade speed, handling and braking controls. Plus, there are options to customize the bike to your liking. What's more, if there's any bike that makes you go a little crazier than others, please go ahead and choose it from the 20 bikes on offer. You can unlock new bikes by using cash or leveling up your game. You also have the option to compete with your friends as it comes with online leaderboard integration and 30+ achievements to unlock. Then there are different gaming environments with day and night variations.

Game Modes: There are four game modes- *Career*, *Endless*, *Time Trial*, and *Free Ride*. You start with the *Career mode* that has over 40+ levels; each level requires you to make it to checkpoints and finish "missions" by avoiding vehicles

and other obstacles. Needless to say, the levels get harder as you progress in the game. Other game modes require you to reach a certain level in the *Career mode* to unlock them.

To sum up, with easy-to-handle controls, stunning graphics, realistic sounds of bike engines, first-person camera view, and a uniquely programmed set of AI motorbikes to navigate, this game will keep you busy for a while. Go on, download, rev up and race in traffic!

Available on: iOS, Android and Windows Phone

Price: Freemium

Lane Racer is simple yet challenging multiplayer racing game to play with your friends during a break.

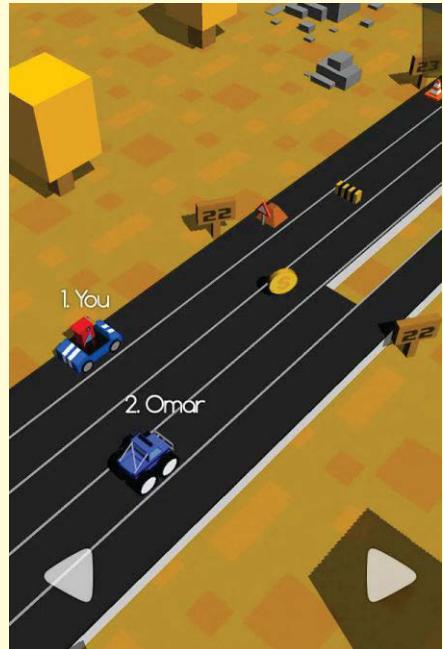

LANE RACER

By BoomBit Inc.

Lane Racer, as the name indicates, is the challenging racing game that requires you to tap your car either left or right to switch lanes, avoiding the traffic and other obstacles in the way. It sounds simple, but actually it is not as you won't get even a few seconds to think about your next tap. It's that quick. In other words, *Lane Racer* is a true test of your reflexes. And your only motive is to stay on the road as long as you can, achieving a record breaking high score every time. There are coins that you can collect along the way, which you can spend to unlock new cars.

The game has two difficulty modes: Easy & Normal, in addition to turn-based multiplayer feature that let you play with your Facebook friends. You can also play this game on Apple TV with up to 8 friends in the multiplayer mode. Just connect your iOS device to your Apple TV.

The game developers have also mentioned on the Google Play Store that they will soon add the support for Android TV and Game Pad as well.

All in all, one-touch controls, fast-paced mechanics, and the option to compete with friends make this racing game a good time pass. Give it a try!

Available on: iOS, Android | Freemium

Rude Rider

By Viber Media

Got a need for speed? Play *Viber Rude Rider*! Launched by Viber (an instant messaging app), *Viber Rude Rider* is a free-to-play action-packed racing and shooter arcade game that features its popular sticker character, the irreverent Rudy, as a car driver.

Viber Rude Rider offers a gameplay where you've to race through traffic, blow up cars, helicopters, tanks and any other obstacles in your way. The more obstacles you shoot, the more coins you'll collect, and you can use them to buy boosters, weapons and shields in order to upgrade your car.

You can also play with your Viber friends using Viber Connect option and smash your way to the top of the game's leaderboard. Then there are weekly rankings, daily challenges and prizes that make playing *Viber Rude Rider* a more fun.

Overall, *Viber Rude Rider* is the rudest, crudest racing shooter game around. If you like playing racing games, then you must try this one. You'll definitely like it. The graphics are visually stunning!

Available on: iOS, Android | Freemium

OPPO, known for providing users with advanced and sophisticated "camera-focused" OPPO smartphones, continues its legacy with the launch of OPPO F1 dubbed as the "Selfie Expert" and priced at Rs. 15,990/-. In 2015, OPPO has sold around 50 million smartphones globally, up 67% year on year, with over 3,000 researchers involved in developing innovative technologies as well as high quality and iconic products.

In an email interview with Apps Unveiled team, **Sky Li, OPPO Global VP, MD of International Mobile Business and President of OPPO India**, discussed the features of the newly launched OPPO F1 smartphone and mentioned, "Dubbed as the "Selfie Expert", the OPPO F1 is tailored for selfie supremacy, with excellent purposely-built software and hardware. It features an 8MP front-facing camera with a wide f/2.0 aperture lens and a 1/4-inch sensor, and OPPO's patented Screen Flash feature to make snapping selfies in low-light conditions. One can even shoot selfies using hand gestures and spoken commands. Add to that, the F1 also sports a 13 MP rear camera with an ISOCELL sensor, the phase detection autofocus (PDAF) with a focus time of just 0.1s, and the anti-shake optimization feature which enables the camera to automatically select the clearest image from a huge buffer of image data the moment the shutter button is pressed". Edited Excerpts:

Q. Please tell us a bit about the F-Series of OPPO Smartphones, which has been recently launched in the market.

OPPO is known for its outstanding photography and it continues its legacy with the F1 dubbed as the "Selfie Expert" already launched in India. It boasts of a standout front-facing camera, a sophisticated photography platform and powerful software, which are specially designed to capture stunning selfies.

The OPPO F1 is tailored for selfie supremacy, with excellent purposely-built software and hardware. It features an 8MP front-facing camera with a wide f/2.0 aperture lens and a 1/4-inch sensor, allowing for 44% more light to enter the camera than an f/2.4 aperture lens. The F1 also offers OPPO's Beautify 3.0 feature, which ensures stunning selfies in all conditions. Beautify 3.0 removes blemishes, highlights a subject's features and includes 3 different beautify modes along with 8 filters. What's more, OPPO F1 offers Screen Flash feature to support low light selfies.

In addition to the outstanding

selfie features, the OPPO F1 also offers a great overall photography experience. The F1 sports a 13MP rear camera with an ISOCELL sensor for reducing pixel noises. The camera also features phase detection autofocus (PDAF), delivering a focus time of just 0.1second. Meanwhile, the anti-shake optimization feature enables the camera to automatically select the clearest image from a huge buffer of image data the moment the shutter button is pressed. In addition, it has many more interesting features like Double Exposure, Slow Shutter, Ultra-HD, Super GIF, HRD, just to name a few.

Q. Why one should prefer OPPO smartphone over other brands? Your top three reasons for that.

OPPO is committed to providing users with advanced and sophisticated camera-focused smartphones and is dedicated to delivering exquisite products and thoughtful services to consumers around the world. We always put user value first and develop differentiated products and services to meet user demands. Our products are developed to

provide services from the perspective of users and are wholeheartedly focused on satisfying the central requirements and needs of target users. In summary, our camera experience, beautiful design and customer-oriented features make us different from other brands.

Q. As we have seen in advertisements, OPPO smartphones have been promoted as a selfie phone, or for its camera unique features. So what makes OPPO smartphones' built-in camera different from other brands?

Nowadays, smartphones are taking over as personal cameras, which makes camera as the most important factor for smartphone buyers in the future. For OPPO, it has constantly been focusing on mobile photography.

In 2008, when OPPO launched its first feature phone A103, it had the best photography performance in the segment. In 2012, OPPO integrated the first-ever beautify function into Ulike 2, followed by many brands later. To capture amazing selfies, OPPO invented the world's first rotating and then

the world's first motorized rotating camera on its N series, namely the N1 and the N3. OPPO also created the first Ultra HD feature capable of shooting 50MP photos in 2014, and later the first Screen Flash feature, so users can take selfies in low light conditions, in early 2015. With the accumulation of its past legacy of mobile photography technology, the increasing consumer demand towards it and the high recognition of OPPO camera functions, OPPO is bringing best camera phone experience such as the most Bright and beautiful, Selfie Expert F1 all the time.

Q. What about OPPO 'After Sales-Service' Policy for its handsets? Would you like to share any details with our readers?

As a part of the new policy every OPPO smartphone will now have extended warranty. All new handsets purchased from 15th December 2015 onwards will have a 2 years' service warranty applicable across all OPPO service centres in India.

According to the new policy, any new OPPO handset that develops a functional defect within the first 30 days of purchase will be termed (i.e. 30-day replacement policy), as 'Dead after Purchase' and handset will be replaced automatically. If the device comes up with any performance fault listed in the Schedule "Performance Failure Table" during first two years of purchase, customers can get service under warranty or maintenance. The accessories such as charger, data cable, headset and battery (including internal battery) come with a 6-month warranty.

Q. What has the response been like so far from the Indian market? What is your overall market share and position in India and globally?

There has been positive feedback from customers about the product quality in terms of the design & innovation, and on the after sales service. OPPO has co-developed

products with customers based on their feedback in both hardware and software user experience. In this price sensitive market, there is a certain section of consumers who are extremely technology savvy and looking for innovative and power-packed devices and OPPO satisfies the consumer needs with its products.

OPPO sold 50 million units in 2015, ranking globally No.8 by shipment according to TrendForce report. In China, OPPO ranks No.2 in offline market just next to Apple. In Vietnam, OPPO ranks No.2 in market share. And OPPO is a leading brand in market share in Malaysia, Indonesia and Thailand.

Q. What do you see as OPPO's biggest challenge this year? What is your shipment target (in India) for this year?

The biggest challenge is always about the best product and best camera experience, we are always aiming to bring best products with outstanding camera experience. We will bring some more models to Indian market soon. We target good user experience rather than specific sales number.

Q. Please shed some light on your roadmap for next three years?

On the brand aspect, we expect our brand will become a well-known name for its camera innovation, quality and service over the next five years. The company has plans to expand more service centers this year. We are targeting 35,000 sales outlets (including official and leading partner stores) in total in India by the end of 2016 and more than 180 official service centers in India by the end of 2016. And, we will leverage our global partnership with ICC for the next four years and the great influence of our South Asian ambassador Bollywood stars Hrithik Roshan & Sonam Kapoor.

Q. Lastly, what would be the one liner for OPPO Smartphones?

Global Top 10 Mobile Maker!

I am a regular user of photography apps

My message for Apps Unveiled Readers:

Apps Unveiled is gaining popularity amongst youngsters and is always bring latest updates from the mobile apps industry for its readers. Similarly, OPPO Camera Phones are providing its users with the latest and innovative technologies and hope to connect with Apps Unveiled readers through the magazine.

Manage Your Personal Expenses

If you'd like to get your personal expenses under control, then start managing them today. The simple fact is, by tracking your spending you'll be able to stick to a budget, and that'll result in savings.

Take a look at these 5 handy mobile apps that can help you easily set a budget and log your expenses on the go.

WALNUT

Track + Split Expenses

Presenting *Walnut*, an Android based personal expense manager app that manages your daily expenses, bank accounts, credit cards, bills and more, but with a different approach. Unlike other apps that require a user to enter all the expenses manually, this app automatically reads SMSes that you receive from your bank, online and offline merchants on doing a transaction, and then makes a note of each expense, income, due bills and account balance in an intuitive interface.

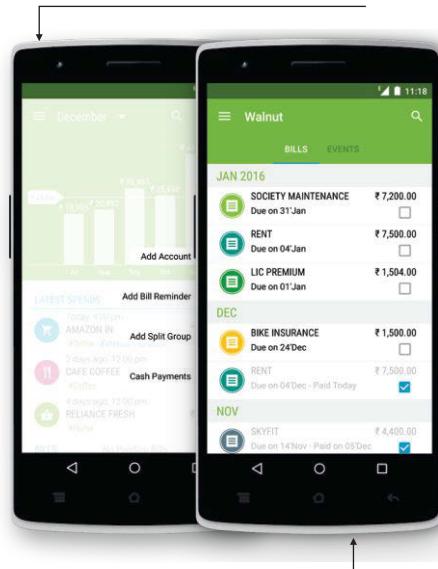

It always works in auto-mode and thus works flawlessly with zero input from the user. However, if you need to input cash transactions, you can add it manually. There is also a provision to add tags, notes and photos of a bill/receipt while inputting an expense. It is worth noting that the app claims to only look at the messages coming from businesses and banks. It does not analyze personal information or data coming from a 10 digit mobile number. In fact, there's even no need to connect your bank accounts to get it all working.

Not only it manages all your financial data in one place, it also provides smart insights and intuitive visualizations about your expenses. The app provides you with the percentage breakup of your expenses and lets you track where you spend most of your income, for example, entertainment, food, travel, shopping, rent, and so on. The app also keeps a track of your ATM Withdrawals so you never have to pay ATM over-use fee.

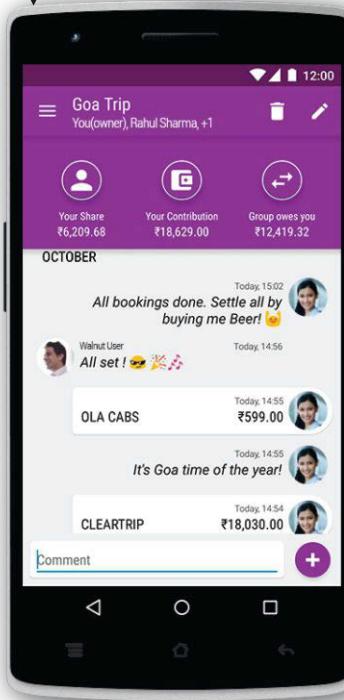

You can also use this app to track, split and settle your joint bills with friends over a chat. Just go to an expense, tap on the *Split* icon, and then add friends to create a Split group. Each group member will

Add Custom Accounts, Bill Reminders and Expenses

Automated Bill Reminders

Split, Chat, Settle with Friends

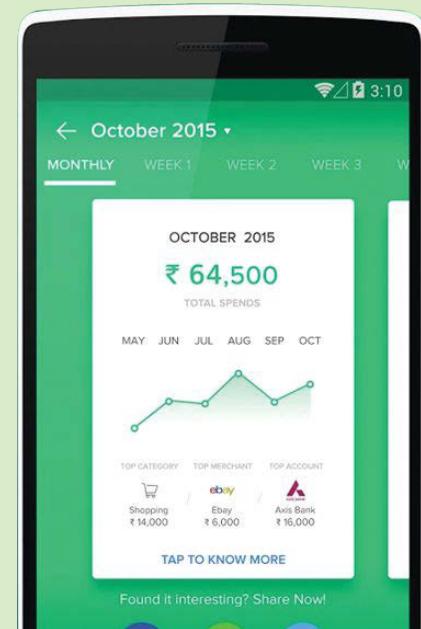

ANOTHER OPTION

SmartSpends

By Times Internet Ltd

Just like *Walnut* app, *SmartSpends* app also reads the transaction SMSes you receive from your bank, online retailers, and other such merchants in order to make a note of the amounts you have spent or received. It neatly organizes all your spends by category (such as eating out, travel, ATM withdrawal, etc.), merchants, and accounts (shows which card has been used to make the payment) and also provides you a summary of your expenses, including month-on-month comparison of your spends, your top spending categories, merchants, etc.

It can also decipher bill notifications and create due date reminders, so you don't face late payment charges. Not only that, it can even suggest which debit or credit card you should use for your intended purchase so you can avail that extra discount, if available.

Available on: Android | Free

Available on: Android | Free

SPENDING TRACKER

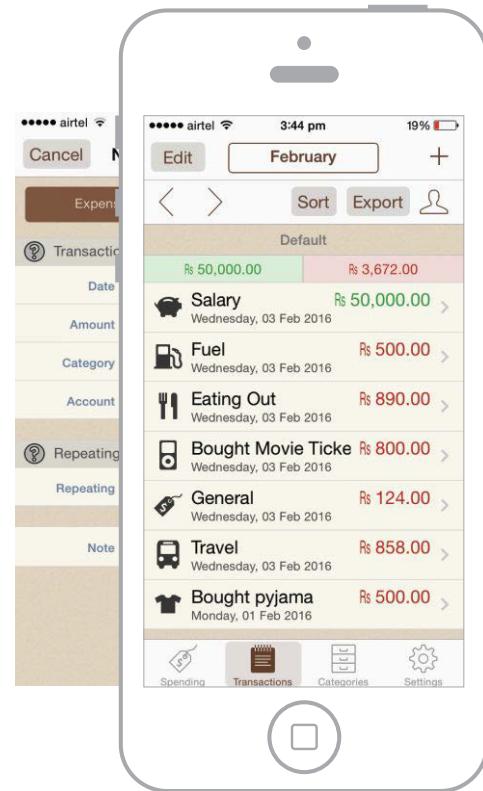

By MH Riley Ltd

Spending Tracker is as simple as an app can get. Once you've the app installed on your device, you can start by adding your expenses one by one. Then you can also add your income to know the available balance at any time. Inputting the data for expenses is quick and painless. You have to just enter the date of expense/purchase, amount spent, expense category (such as clothes, fuel, eating out, gifts, etc.) and account used (if you are managing multiple accounts within the app). Based on your inputs, the app will generate a quick list of your expenses and shows you a remaining balance in each account.

The app also generates interactive pie charts and bar graphs so you get to know where you spend most of your money. The charts display spending breakdown by category and a history of your Cash Flow over time. You can choose to track your expenses either weekly, monthly, or yearly.

As mentioned earlier, the app allows you to manage multiple accounts (for example: cash, bank, personal, business, etc.), so you can better manage your day-to-day expenses the way you want to. You can create multiple accounts in the app's settings. Then you can also set up a budget for each account to keep an eye on the outflow of money. The app also allows you to transfer money between accounts that you are managing within the app. Just go to the Settings tab, tap *Accounts* and then transfer the amount. You can even link the app to your Dropbox account in order to sync your data and create an easy backup. There is also an option to lock the app with a password.

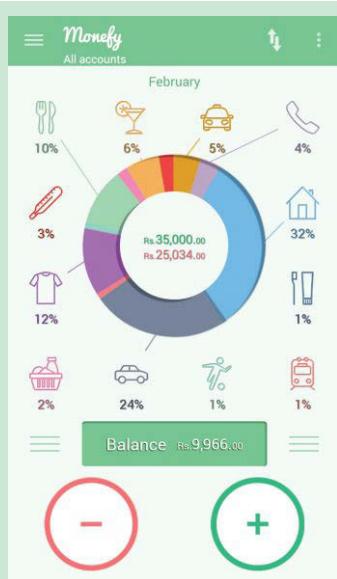

Then upgrading to the Pro Version gets you more benefits. You get to enjoy an ad-free interface, with an auto-sync and backup/restore

option. You also get the option to mark an expense or income as a recurring one while adding that expense/income in the app. You are even allowed to export your data as PDF or CSV file.

Overall, *Spending Tracker* is a simple app with no complexities and lets you track your daily expenses in a neat and clean, intuitive user interface.

Available on: iOS, Android & Windows
Price: Freemium

Monefy

The thing about tracking daily expenses is that it can be very, very boring. That's where *Monefy* app comes to your rescue. Adding an expense is so quick and easy. It all requires you to tap on the relevant expense category icon, enter the amount spent and note (if any).

As soon as you add your first expense, the app provides you with the percentage that every expense category takes up from the total so that you can get an overall idea on how you are spending most of your funds. The app makers have tried to keep the interface minimal and thus provide you useful insights in one view.

Needless to say, you can also add your income to get a fair idea about the balance you are left with. Tapping the *Balance* tab on the home screen gives you the list of all your expenses and number of transactions in each expense category.

Record Your Expenses

AndroMoney is a robust expense tracking tool that would be sufficient for all your finance management related needs. From helping you with your daily accounting needs, managing multiple accounts with multiple currencies and various expense categories, to drawing up detailed expense reports, this app does pretty much everything.

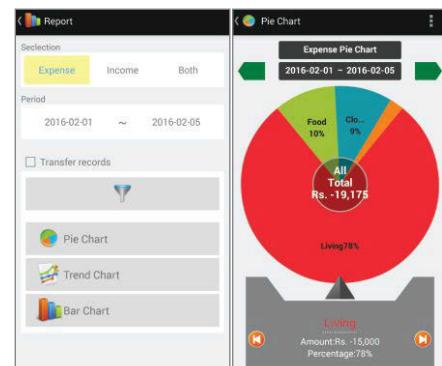

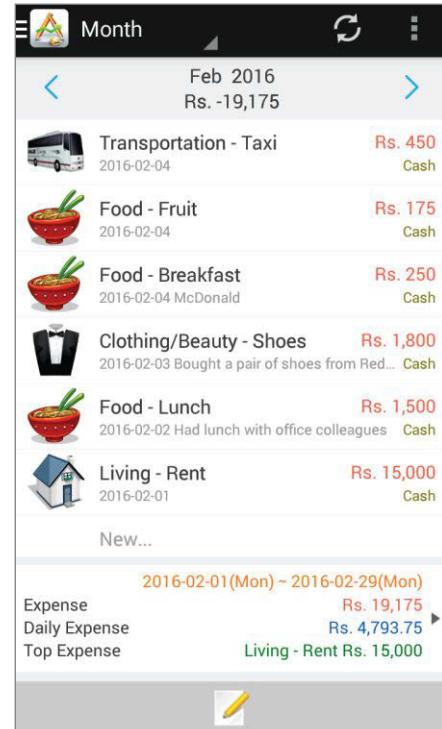

AndroMoney

The app is so simple to use. As soon as you install the app, you can start by adding your expenses or income. The best part is that the app can easily handle recurring expenses/income and multiple accounts. It also allows you to photograph a bill/receipt. Then there is an option to construct a daily, weekly, monthly or yearly budget. You can even set a budget for each expense category as well. Not just that, the app even sends you an alert when you are about to exceed your budget so you can control your expenses accordingly.

Then you also get a daily summary of your expenses that tells you about your top expenses, cash flow and balance in each account. The app also generates pie charts, trend and bar charts so you get a better understanding of where your money is going.

You can also sync the app to multiple devices. Add to that, you have an option to take a backup of your data to either an internal SD card, Dropbox, Google Drive or Email. That's not all! It has a lot more to offer and that you get to

The app even allows you to manage multiple accounts (for example: cash, card, personal, etc.), and then you can also transfer money from one account to another. There is also an option to

do budgeting and carry over the balance. You are even allowed to take a backup of your data. If there's anything to complain about really, it's that there is no option to mark a particular expense or income as a recurring one.

Monefy is a free app; however, there are a few features that are reserved for Pro users such as password protection, Dropbox Sync, and adding new expense categories. Fortunately, these features are not that necessary. Overall, *Monefy* app is the most lightweight and intuitive app that everyone should try.

Available on: Android | Freemium

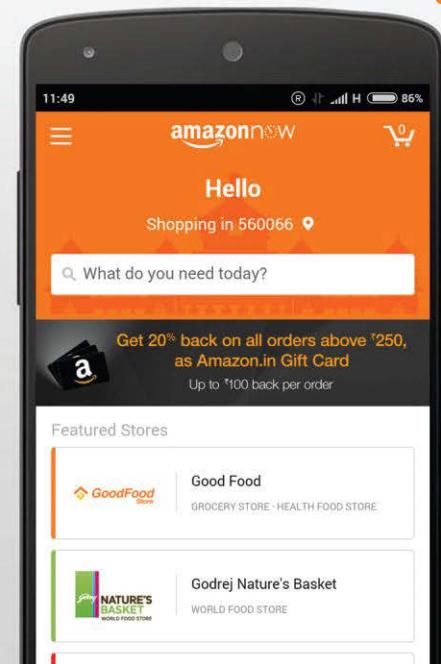

know once you start tracking your expenses using this app.

Overall, *AndroMoney* app is ideal for those who work on different projects at a time. The app makes easy to keep a track of expenses and income associated with multiple projects in one place. Its Pro version on Android gets you rid of ads and offers better user interface.

iOS: INR 120 (or \$ 1.99)

Amazon launched Grocery Service 'Amazon Now' in Bengaluru, Promises to Deliver Groceries within 2 Hours

Looking at the massive market size and trends in the Indian online grocery segment, Amazon, has launched its grocery delivery app in India by the name *Amazon Now*. The app will allow people in Bengaluru to order essential household items from nearby grocery stores. Customers can either opt for an express delivery that promises to deliver within two hours of placing an order, or two-hour scheduled delivery time slot of their choice between 10 AM to 10 PM.

Amazon has tied up with retail chains like Big Bazaar, Reliance Fresh, Godrej Nature's Basket, BPCL In & Out, Food World, and Good Food, as well as local kirana stores. One can order goods from categories like grocery, specialty foods, health & personal care, beauty, home & kitchen, and baby

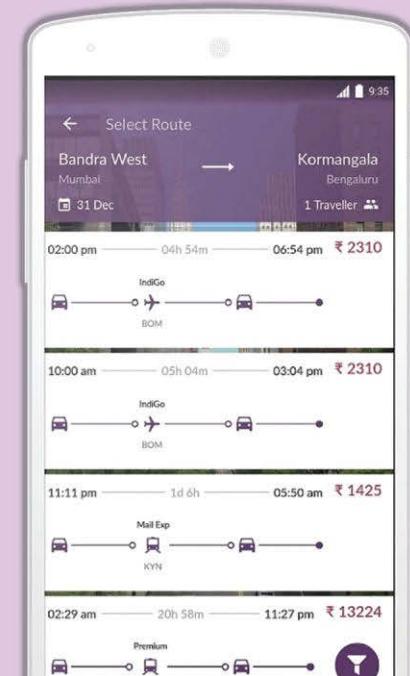

amazon now

items from nearby stores. There will be no delivery charges for orders above Rs. 250/- in value.

At present, *Amazon Now* (an app-only service) is live only on the Android platform, and delivers to over 70 pin codes in Bengaluru. To use this service, users must first enter their pincode on the app, for Amazon to ascertain whether it delivers to that pincode or not. Depending on the success of the *Amazon Now* service in the city, Amazon will probably expand the service in other cities as well over a course of time.

Available on: Android | Free

Routofy

Routofy, online travel itinerary planner, has launched an end-to-end app for travel booking and assistance, which lets you book the entire trip, across different modes of transport, in one go.

Routofy is basically a route-planning portal that helps travellers know the best possible routes to reach any destination across India. With *Routofy*, you can seamlessly search for flights, trains & buses all at once. It provides auto-made direct-indirect multimodal directions to anywhere, with prices and deals from your favourite providers. All on an easy to read and intuitive timeline, so you can compare and select the best travel option for you, at the very first glance.

"We have made the search simpler which

allows users to book all the modes of transport they would be taking from point A to B. We have integrated cabs, flights and buses on the same app. Our online travel assistance also updates subsequent legs of transport on any delay", said Ronak Gupta, Co-founder, *Routofy*.

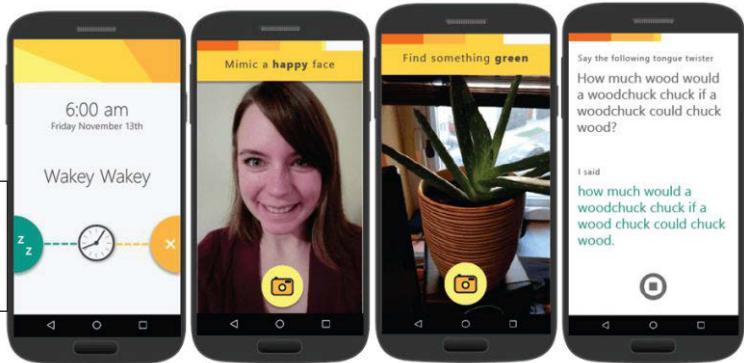

He further added, "The app is also integrated with Uber for intra-city transport and will soon launch train bookings".

Mimicker Alarm

Mimicker Alarm wakes you up, then delivers a series of games to keep you up.

Mimicker Alarm, the latest release through the Microsoft Garage Project, is a free morning alarm clock app that helps you wake up from sleep and stay up by playing a simple alarm game, called a “Mimic”.

To dismiss your alarm in the morning, you must mimic the action given. The app might ask you to snap a selfie with a particular expression, find an object with the same color, or even speak a tongue twister phrase. The app also gives you the option to share the selfie images with friends.

“We’re a lot nicer than other alarms,” says Allison Light, a program manager on a team that develops apps for Project Oxford. “You start with dismiss or snooze. If you snooze, the default is five minutes to delay the game. If you dismiss, we mute the alarm – but then you have 30 seconds to complete the game. And if you don’t complete that game in time, we assume you’ve fallen back asleep and then the alarm will start ringing again. You only need to complete one game to shut off the alarm. You can choose the sounds and which games you want to play.”

The app sports the card-style user interface that matches with the rest of the Android UI. Setting up an alarm is easy. It gives all the regular options seen on other alarm apps.

Mimicker Alarm might sound like the world’s most insane and annoying alarm, but it’s really designed to be a fun little app that shows off what Microsoft’s machine learning is capable of. For those unaware, Microsoft’s Garage project is the company’s community of interns, employees, and teams who come together to turn ideas into real projects.

iPhone users now have one more selfie enhancement app to touch up their selfies, with just one click!

Microsoft Selfie

Microsoft recently launched an ‘intelligent’ selfie app called *Microsoft Selfie* for iPhone users. The app’s function is to simply make the images appear enhanced and better by automatically adjusting the color balance, skin tone, and lighting in the given environment. The app relies on the specific algorithms to enhance selfies with a single tap. Key features are noise reduction, intelligent enhancement, automatic exposure correction, and color theme.

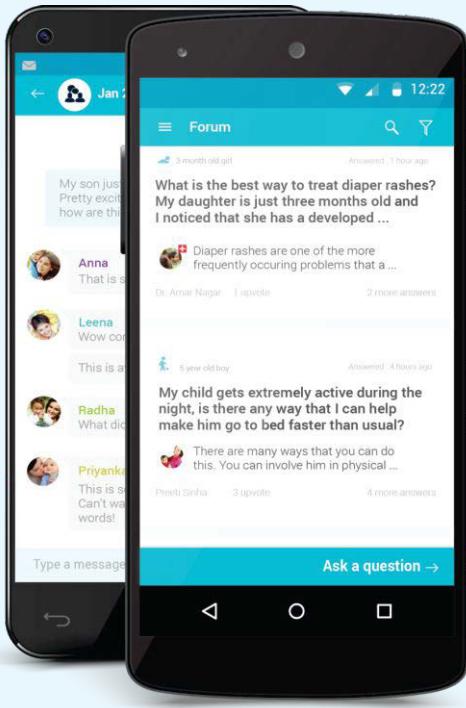

The user interface of *Microsoft Selfie* is fairly simple with minimal and easy to access features. You can either click a new image from the device’s front-facing or rear camera, or select an existing image

from the local storage. The app intelligently considers age, gender, skin tone, lighting, and many other variables into account, and finishes enhancement with just a single click. In dim light condition, the app would automatically enable “Denoise” mode, and effectively reduce noise by using burst shots. Thus, the app has an ability to transform average photos into more presentable portraits in seconds. The tweaked image can be further edited using any one of the 14 photo filters, and a slider that lets you manually adjust the effects.

The quickest way to get answers to all your parenting queries.

tinystep

Tinystep serves a very fundamental need of parents, especially the moms; the need to connect, ask and share with other parents going through the same phase in life. *Tinystep* app aspires to be the much-needed vertical social network around parenting; connecting parents, doctors and other providers not just in India but all over the world.

To facilitate casual conversations, *Tinystep* app groups parents together in chat groups based on their child's month of birth. Parents can even create their own chat groups. Then, parents can also ask questions anonymously in the open forum where other parents and even pediatricians answer the queries.

The app has features such as:

- Browse through information on tons of parenting and childcare topics
- Stay connected with other parents through group chats
- Track your child's growth and get vaccination reminders

The app has many promising features lined up, such as, Milestones tracking - your baby's first steps, first tooth, etc. – so you never miss out on anything; Meetups – to encourage parents to organize meet ups directly through the app – and a lot more.

Available on: Android | Free

Music Memos

Apple Inc. unveiled a brand new app for iOS users by the name *Music Memos*, designed specifically to help musicians and songwriters to quickly and easily record audio and develop song ideas on the go.

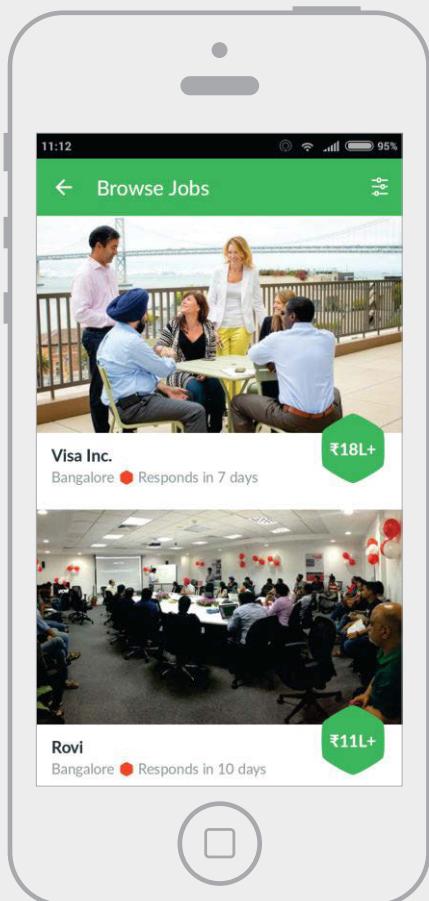

Music Memos app has musician-friendly features, which are designed specifically for songwriting and developing musical ideas. With *Music Memos* app, you can record any musical instrument, voice, audio or lyric ideas through the iPhone's built-in microphone (or using an external microphone) in a high-quality, uncompressed format. Once you're finished with recording, you can name, tag and rate it to start building a library of your song ideas.

The app is optimized for acoustic guitar and piano, and it works with

other musical instruments, too. The app can detect your tempo, rhythmic feel, and even provide basic notation that displays the chords that were played. Then you can hear how your music sounds with a realistic virtual drummer and bass player jamming along. If your performance speeds up or slows down, so does the band. You can even tweak the energy and performance of the drums or bass with a few simple controls. What's more, you can share your song ideas with friends as well.

Available on: iOS | Free

HackerRank Jobs app makes the decades-long “resume black hole” problem obsolete.

HackerRank Jobs

Bengaluru-based programming code-challenge community – HackerRank launched *HackerRank Jobs* mobile app, a recruitment platform for programmers. It is the first job search app that's completely reinventing the way candidates apply for developer jobs, and the way companies' source candidates.

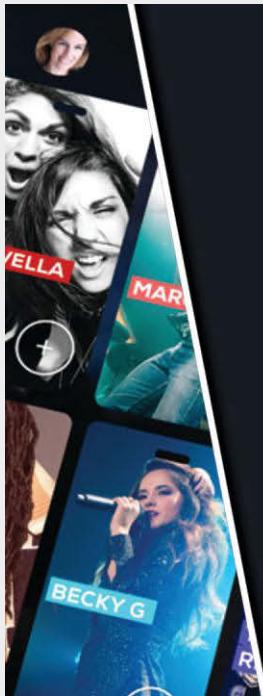

Instead of applying with a resume, you can apply for a job by requesting a code challenge from a company with just one tap, and then can solve it at your convenience. You're not only guaranteed a response from companies within 5 business days, but you can also see the average time it takes for a company to respond to applications before you apply.

Launched in a limited beta, the app has jobs listings from Indian and US-based tech companies published online, which include VMware, Visa Inc, Practo, Uber, Quora, Zenefits, Palantir

Technologies, and Amazon. Almost 40 companies are already using *HackerRank Jobs* to source candidates. The companies can check out the candidates' code challenge scores on either web or mobile, and they also have the option to call candidates immediately. The *HackerRank Jobs* ecosystem even offers a built-in scheduler that automatically prompts applicants to choose 3 open time slots for potential interviews. Thus, all these facilities speed up the process of recruitment, both for companies and candidates.

Overall, with benefits like guaranteed five-day response times, automated skill-based code challenges, Q&A with the company's engineers, and salary transparency, *HackerRank Jobs* app has been created to help speed up the process of finding, evaluating and hiring engineers.

Available on: iOS, Android | Free

Bkstg

Get closer to the Musicians you love. Watch, listen and interact with their entourage and other fans.

A new app named *Bkstg* has been launched for iOS, and is meant to serve as a global platform where fans can watch exclusive videos, listen to music, and amongst the first ones to purchase limited edition merchandise or VIP tickets for a music concert. One can also connect directly with other fans.

Available on: iOS | Free

“We believe fans should be able to have everything about their favorite artists in one place, and the most loyal fans should be able to get noticed, get access, and get closer. We believe artists should have a platform to connect with their fans, on their terms and with no restriction. This is just the beginning. Thank you for being a part of it,” says the company web page.
